# Energy Consumption vs GDP per capita

Created by Theodore Dyer - Starter code from UCSC CSE 163 with Suresh Lodha

Description: Zoom behavior: All of my testing and development was done on a laptop with a trackpad, so I was able to get everything working using the following: To pan, click and hold on a circle and drag (this should transform circles AND country names trackpad downwards, upwards to zoom out. To display country tooltip, simply hover over the circle in question.
